SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	04/12/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary

Application No.

09/688,698

Applicant(s)

NATHAN ET AL.

Examiner

Dat T. Nguyen

Art Unit

3714

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 January 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 12 and 15-23 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 12 and 15-23 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Amendment

This office action is in response to the amendments filed on 01/31/07 in which applicant amends claims 12 and 19, adds new claims 20-23 and responds to claim rejections.

Claims 12 and 15-23 are pending.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12 and 15-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Martin et al. (US 5,848,398) in view of Johnny Rockets Name That Tune and further in view of Tom & Liz's Name That Tune and Winksy et al (US 5,739,451).

Martin et al. discloses a method and apparatus for managing a plurality of computer jukeboxes at different locations from a remote central station. The remote central station maintains a host computer having a master library of songs stored in a bulk storage unit and each "jukebox" maintains a subset song library of the master library of songs. Each jukebox is updated with new songs and menus by simply downloading the data via a transmission link. Furthermore, in one embodiment, the computer jukebox is associated with an electronic game. Martin et al. additionally discloses:

Regarding Claims 12 and 19:

Art Unit: 3714

- a remote server (central management system (11)) and at least one terminal (jukebox #1..jukebox #N (13)) operable to communicate with the server over a communications network, wherein the terminal (jukebox) includes an audio system (127, 129, and 131) for playing in connection with a game (electronic game) at least a portion of a musical recording (Abstract, Figures 1, 4A, 4B, 5, Column 1, line 66-Column 2, line 51, and Column 3, line 15-Column 4, line 40, and Column 9, lines 38-42);
- the terminal is a jukebox system that includes a storage device (93) that stores a library of musical recordings (91) that can be played in full on the terminal for a fee (Figure 5), and further wherein the library of musical recordings can be updated with additional musical recordings through communication with the server, thereby defining a customized library of musical recordings on the jukebox system (Abstract, Figure 1, 4, 5, Column 1, line 66-Column 2, line 51, Column 3, line 15-Column 4, line 40, Column 4, lines 58-63, Column 5, lines 40-57, Column 6, lines 8-18, Column 6, lines 45-52, and Column 7, lines 39-57).

Martin et al. seems to lack explicitly disclosing:

Regarding Claims 12 and 19:

- a display that displays information in the form of a question and suggests multiple choice answers to the question, wherein the question relates to the portion of musical recording that has been played, a user interface that enables a user to select an answer from the displayed multiple choice answers, and a scorer for recording the answer selected by the user and determining if the answer corresponds to a correct answer; and

Art Unit: 3714

- further wherein the jukebox system is operable to dynamically select the musical recording for the game from the customized library of musical recordings and to dynamically generate the question for the game based on the contents of the customized library of musical recordings stored on the jukebox system.

Regarding Claim 15:

- the terminal sends information to the server regarding how the user performed during the game.

Johnny Rockets Name That Tune teaches of a Name that Tune game that is played over a network, such as, the Internet. Johnny Rockets Name That Tune and Martin et al. are analogous art because each are computerized game systems that are associated with music played on jukeboxes. Johnny Rockets Name That Tune, however, seems to lack explicitly disclosing playing a song for a fee.

Johnny Rockets Name That Tune teaches:

Regarding Claims 12 and 19:

- a display that displays information in the form of a question and suggests multiple choice answers to the question (questions 1-5), wherein the question relates to the portion of musical recording that has been played, a user interface (Web page and player personal computer mouse and keyboard) that enables a user to select an answer from the displayed multiple choice answers, and a scorer for recording the answer selected by the user and determining if the answer corresponds to a correct answer (How Did I Do?); and

Regarding Claims 15 and 19:

Art Unit: 3714

- the terminal sends information to the server regarding how the user performed during the game (How Did I Do?).

It would have been obvious to one having ordinary skill in the art, at the time of the applicant's invention, to incorporate Johnny Rockets Name That Tune game in Martin et al. One would be motivated to combine Martin et al. with Johnny Rockets Name That Tune because the Johnny Rockets Name That Tune game is entertaining and would provide an additional source of profit for Martin's computer jukebox system when in the game mode. Regarding claims 12 and 19, Martin et al. also seems to lack explicitly disclosing:

Updating of the customized libraries of musical recordings stored on the jukebox system with musical recordings stored on the server for the needs of the game. Tom and Liz's Name That Tune is a music trivia game that updates weekly (pp 1 of 10). The music for the game must be the same for all systems on the network. Martin et al. also discloses the ability of the central server to transmit songs to the jukeboxes as needed. Martin et al. and Tom and Liz's Name That Tune are analogous art because both are computerized games played over a network associated with music. Therefore, it would have been obvious to one of ordinary skill in the art at the time of invention to incorporate the weekly updating of the song library with the jukebox networking system of Martin et al. One would be motivated to combine Martin et al. with Tom and Liz's Name That Tune because it the prospect of competing with other plays would raise user interest in the jukebox system.

Further, the prior art is silent regarding the disclosure for a random selection of the musical recording for use in the game from the customized library. It could be interpreted that the game operators of the prior art can be said to have randomly selected the musical recordings from the game library. However, in a related patent, Winsky discloses a musical

Art Unit: 3714

trivia game wherein musical recordings are stored onto memory of a controller and the recordings may be randomly selected for use in the trivia game. Therefore it would be obvious to one of ordinary skill in the art at the time of applicant's invention to implement the random musical selection of Winksy in order to introduce variety into the game so players are offered different game scheme each time the game is played as oppose to being offered the same questions and answers which makes subsequent play of the game undesirable.

Regarding claims 16-18, Johnny Rockets Name That Tune teaches that as discussed above regarding Claims 12, 15, and 19. Johnny Rockets Name That Tune seems to lack explicitly disclosing a ranking system to rank player' performance.

Tom & Liz's Name That Tune, like Johnny Rockets Name That Tune is a computer/network-based name that tune game. Tom & Liz's Name That Tune shows:

Regarding Claim 16:

- the server collects game performance information for a plurality of different users and ranks the users according to their performance (pp. 4 and 5 of 10).

Regarding Claim 17:

- the server is operable to send user-ranking information to the terminal, and the terminal is operable to display ranking information.

Regarding Claim 18:

- the system includes a plurality of said terminals (each player's personal computer having an Internet connection) at different locations (players live in a plurality of states), each of the terminals being operable to communicate with the server, and further wherein the server is operable to collect performance information on

users who play the game at any of the terminals to send user ranking information to each of the terminals.

It would have been obvious to one having ordinary skill in the art, at the time of the applicant's invention, to incorporate the player performance ranking system of Tom & Liz's Name That Tune game in Johnny Rocket's Name That Tune game and Martin et al. Providing a display of player rankings for games or game tournaments is notoriously well known to one of ordinary skill in the gaming art. Doing so motivates a game player to perform well and enables players to size up the competition.

Regarding claims 20-23, Winsky teaches a musical trivia game wherein the game is further operable to randomly select a question about the selected recording from a list of predetermined questions (Winsky 8:20-30). The randomly generated questions are based on the recording and stored on the system. Winsky also teaches that only a random portion of the entire recording may be played back (7:28-54). Regarding claim 23, wherein the system is further operable to select a portion of the selected recording for playback to a user based on at least one predetermined criteria, the predetermined criteria can be that the recording must be on the system. Therefore it would have been obvious to one of ordinary skill at the time of invention to include the random question types of Winsky and the random portion of the recording to play back in order to increase the difficulty of the game whereby players must be able to recognize the a song from a small bit of recording as well as be able to answer random trivia questions about the song and not just the song title.

Response to Arguments

Applicant's arguments with respect to claims 12 and 15-23 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dat T. Nguyen whose telephone number is (571) 272-2178. The examiner can normally be reached on M-F 8am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert E. Pezzuto can be reached on (571)272-6996. The fax phone
